Women-Owned San Jose Engineering Firm Says High-Speed Rail Small Business Participation Goal is Creating Opportunities

SACRAMENTO, Calif. – NSI Engineering is a woman-owned San Jose-based firm doing quality assurance on the Northern California portions of the high-speed rail program and represents one of the 11 million women-owned businesses in the country. NSI is not only certified as a woman-owned small business but certified as a disadvantaged business and a disabled veteran business. October is National Women's Small Business Month and according to SCORE, women-owned businesses in the U.S. support nearly nine million jobs and generate annual revenues of \$1.6 trillion. As of June 2016, there are 48 women-owned small businesses working on the high-speed rail program.

Watch the video so see why NSI Engineering owner Laura Uden says the High-Speed Rail Authority's aggressive small-business participation goal has given her company opportunities it might have not otherwise received.
